WHAT ARE **NDAA** COMPLIANT SECURITY CAMERAS?

The National Defense Authorization Act (NDAA) restricts the use, procurement, or sale of certain brands of surveillance equipment for federal agencies. Federal agencies are prohibited from purchasing equipment from these brands, but they can't do business with contractors that use surveillance technology from backlisted products.

The NDAA specifically bans security camera brands, including Dahua, Hikvision, and Huawei. The ban also includes any brands that may function

under or as part of these companies, including brands affiliated with these companies. NDAA regulation not only prevents federal agencies from installing cameras made by companies on the black list, but also prohibits them from doing business with any organization that uses them.

This means that as a security leader, integrator, or facility manager you don't want to take the risk of installing non-NDAA compliant security systems for both compliance and cybersecurity reasons.

HELLO & WELCOME

➤ At **PROTECSYS**, our commitment lies in achieving the ideal fusion of dependable security and cutting-edge technology. We specialize in crafting innovative, tailor-made solutions and technologies to guarantee the continuous monitoring and protection of our customers' assets, 24 hours a day.

➤ We operate across diverse sectors catering to a wide range of security requirements, including embassies, retail stores, businesses, hotels, restaurants, gas stations, car wash stations, logistics, manufacturing, public administration, and beyond. Regardless of your industry, ensuring your peace of mind is our ultimate mission.

WHAT DO WE DO?

As a specialized expert in video surveillance and alarm systems, we will send a professional to your location for a comprehensive site visit. During this inspection, we will thoroughly assess your security needs and provide a detailed report as part of our direct consultation service. This personalized approach ensures that we tailor our solution to perfectly match your requirements.

We will talk through your needs and the options available, before installing a security system tailored specifically to your needs.

We take pride in installing security systems that utilize the most efficient and reliable technology available. Our expertise allows us to incorporate cutting-edge surveillance equipment, ensuring the highest level of performance and effectiveness. With our focus on innovation, we strive to deliver advanced solutions that meet and exceed your security expectations.

Advanced with Flame Detection sensor and AI technology
Intelligent Fire Detection CCTV Camera

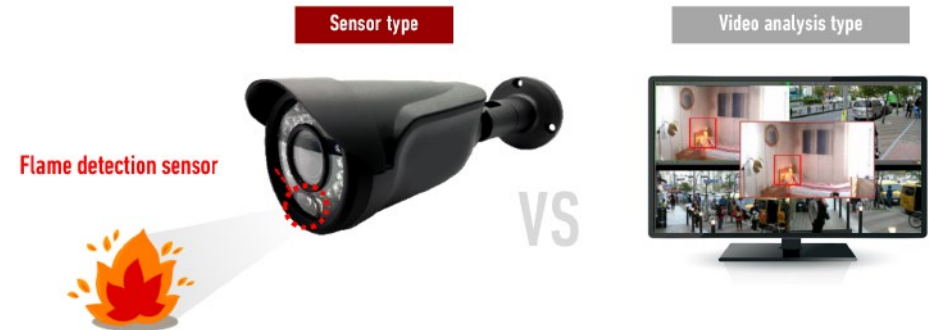

**FIRE DETECTION
SENSOR**

MAJOR FEATURES

FEATURES - UNIT

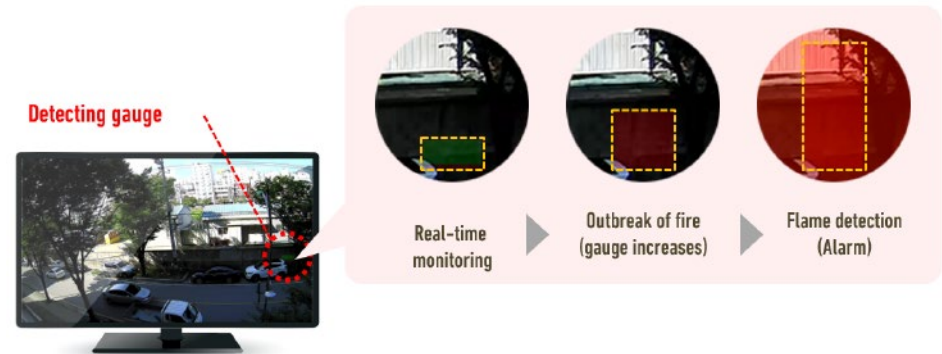

Flame detection with dedicated sensor

- High accuracy by detecting the flame's unique wavelength
- Low false rate compared to video analysis method which analyzes color and shape
- Optimal algorithm based on 5 years of field experience

Flame detecting gauge

- Detecting gauge displays flame status visibly
- Real-time check for malfunctioning of product

Detection time

- Sensitivity is adjustable, minimum 1 second for flame detection (<10 seconds)
- Video analysis type requires minimum 10 seconds for analysis

WHAT ARE HALOGENS?

Elements such as fluorine, chlorine, bromine, iodine and astatine are halogens and appear in the seventh main group in the periodic table of the elements. They are found in many chemical compounds, for example in polyvinylchloride. PVC, as it is known for short, is very durable, which is why it is used in many technical products, as well as for insulation and sheath material in cables. Chlorine and other halogens are often included as additives to improve flame protection. But that comes with a price. Halogens are harmful to health. For this reason, plastics that do not contain halogens are increasingly being used for cables.

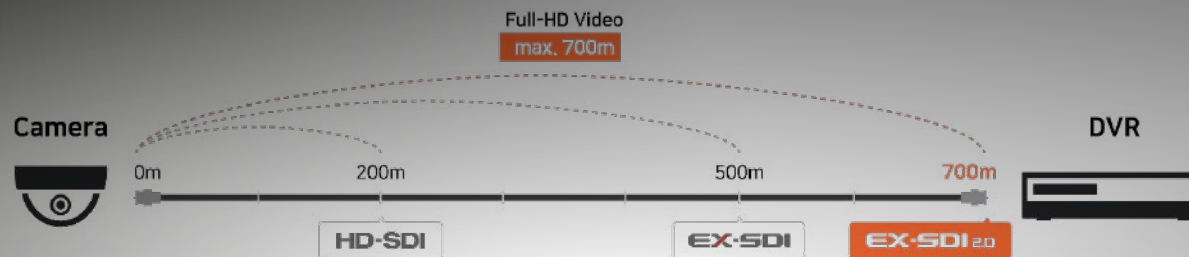

What is a halogen-free cable?

As their name suggests, halogen-free cables are halogen-free in the composition of the plastics. Plastics containing halogens can be identified by the chemical elements in their names, such as the previously mentioned polyvinyl chloride, chloroprene rubber, fluoroethylene propylene, fluoropolymer rubber, etc.

Why are halogen-free cables important for fire protection?

Halogens can damage health. This is particularly the case when halogenated plastics, particularly PVC, burn. If a fire breaks out, hydrogen halides are released

from the plastic. Halogens combine with water, such as the extinguishing water used by the fire brigade or fluid from the mucous membranes, to form acids - chlorine becomes hydrochloric acid, fluorine the highly corrosive hydrofluoric acid. In addition, a mixture of dioxins and other highly toxic chemicals can be formed. If they get into the airways, they can cause damage and cause suffocation. Even if someone survives the fire, their health can be permanently damaged. This is much less the case for halogen-free cables.

(Based on Non-POC, SC, HFB 1 Cable)

OUR SERVICES

Your journey towards the cutting-edge video security has just started. At **PROTECSYS**, we offer a complimentary audit and a no-obligation quote within 24 hours. Additionally, we provide the option to **lease our products at 0%* interest**, making it even more accessible for you to enhance your security measures.

We are proud to inform you that **there are never any subscription fees associated with our products**. Moreover, all our offerings come with a comprehensive four-year warranty, without any additional charges. Your satisfaction and peace of mind are paramount to us, and we stand behind the quality and reliability of our products.

INTELLIGENT VISUAL OUTDOOR SECURITY

Visual Verification for Peace of Mind UNIQUE DETECTION TECHNOLOGIES Sway Recognition™ and Digital Correlation™

Crystal Clear Visual Verification

Beyond outdoor detector has an integral camera which is activated upon intruder detection, sending a series of high resolution images via the iRISCO smartphone app., to the end-user and the monitoring station.

Weather Proof Housing - IP65 Rating

The wireless Beyond has IP65 environmental rating for complete protection against water (rain) and dust.

Unparalleled Catch Performance enabled with Dual Technology

Dual Technology (DT) combines two K-band microwave channels with two PIR sensors for better catch performance and pet immunity, minimizing false alarms.

Unique Detection Technologies designed for the Outdoors

RISCO Group's Sway Recognition™ Technology recognizes and dismisses objects that sway and move repeatedly, such as swaying bushes and trees, eliminating them as intrusion events. Digital Correlation™ Technology ensures that only targets causing similar and correlating signals in both PIR channels are seen as potential threats.

Solar Swivel for Extended Battery Life

Beyond solar swivel has an auxiliary, chargeable solar powered battery in addition to its regular power source, providing extended battery life, which is both cost effective as well as a green solution.

Ultimate protection against vandalism

Outdoor detectors can be particularly vulnerable to tamper and vandalism. In addition to the IR anti-mask solution that senses any covering or obstruction of the lens, the wireless Beyond features a unique built-in 3-axis accelerometer that identifies movement of the detector in 3 dimensions. This mechanism provides an ultimate protection for the detector, alerting on sabotage events even if the tamper mechanism has not been physically violated.

Wireless DT and Wireless DT CAM options available

Beyond is available in both wireless DT and wireless DT CAM versions. The wireless DT version is compatible with all of RISCO's wireless and hybrid control panels. The wireless DT CAM model with integral camera supporting visual verification and is compatible with RISCO's wireless control panels.

Direct Sunlight Immunity to eliminate false alarms

RISCO Group's Direct Sunlight Immunity is based on a special algorithm that ignores sudden changes in the intensity of the sunlight, thus eliminating one of the major causes of false alarms in the outdoor environment.

Flexible Installation

Beyond is completely wireless and simple to install in any location that lacks wiring infrastructure. Setting the most effective and appropriate range according to specific installation requirements is allowed thanks to the flexible installation of both adjustable 180° Swivel Bracket, as well as the mounting height, which varies from 1.8m to 2.7m.

EASY CONTROL & FREE OVER APP

PROTECSYS provides a user-friendly, cloud-based solution for monitoring all your security needs through a mobile app. With a simple interface and cutting-edge technology, you can securely access and control your security systems on the go. This ensures your peace of mind, knowing that you can stay connected and in control no matter where you are.

Embassy of the State of Kuwait
Bern - Switzerland

سَفَارَةُ كُوَيْتِ الْكُوَيْتِ
برن - الاتحاد السويسري

Bern, 21.08.2023

TO WHOM IT MAY CONCERN

PROTECSYS GmbH, a specialist in providing video and alarm security systems has installed and updated the video surveillance & alarm system at the Embassy of the State of Kuwait in Bern, Switzerland in August 2023.

During the installation and activation process, Embassy of the State of Kuwait has found the team of PROTECSYS to be highly professional and knowledgeable about their work. They actively pursued the timeframe established mutually, while still be flexible enough to respect the requirements and functioning of the embassy. Their team is always prompt to provide information about queries and has a solution oriented approach towards the execution of the deliverables.

Embassy of the State of Kuwait in Bern has been highly satisfied with the services rendered by PROTECSYS GmbH and looks forward to continue working with them through system maintenance and follow-up.

Sincerely yours,

Embassy of the State of Kuwait

Letter of Recommendation

To Whom It May Concern,

I have the pleasure to recommend and to express my thanks to the company Protecsys GmbH, based in Geneva, Switzerland.

I confirm that in October 2020 Protecsys GmbH provided to the Permanent Mission of Israel to the UN their services and that their approach to work fully met our expectations.

We found the company to be professional, open to adjustments needed, reliable in its advice and attentive to the needs and requirements of the Permanent Mission of Israel.

The quality of service was excellent and responsive.

I would like to recommend Protecsys GmbH as a solid and reliable company providing a high level service.

Sincerely,

Meirav Eilon Shahaar
